## Election/Restrictions

- 1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19 and 21-26, drawn to method of treating inflammatory disease with polyanionic polymer, classified in class 424, subclass 78.06.
  - II. Claim 20, drawn to method of isolating multifunctional proteolytic enzyme form biological specimen, classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

- 2. Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are unrelated because invention I is directed to method of treating a disease condition and invention II is directed to extraction and isolation of a proteolytic enzyme using an affinity column. A proteolytic enzyme is not used to treat an inflammatory disease such as adhesion. A method of extraction/isolation is not a method of treating trauma or inflammatory disease.
- 3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
- 4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
- 5. This application contains claims directed to the following patentably distinct species of the claimed invention: There is greater than one type of inflammatory disease, namely: corneal

Application/Control Number: 09/938,269

Art Unit: 1615

wound, internal trauma that is further defined by claim 8, adhesion and the conditions enumerated in claim 18. Secondly, there is greater than one polyanionic polymer claimed, namely, a clearable polymer or polyanionic polymer that is not a microgel and these polymers are further defined by functional groups and monomeric units in claims 10, 11 and 12.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, regarding Group I, a method of treating inflammatory disease is generic.

If applicants elect Group I, applicants must further elect a single composition for treating the inflammation and that composition must be completely defined by a single polymer according to the functional group and monomer. Applicants must also elect a single inflammatory disease recited in claim 18 or claim 1 claim 7. Applicants may also elect additional ingredients and any additional ingredients not elected will be considered as non-elected claims.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Application/Control Number: 09/938,269

Art Unit: 1615

the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

- 6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
- 7. The following observation is made to further help the prosecution process:

Claim 6 ends in "comprising:"

Claim 9, which is dependent on claim 1 requires that the polyanionic polymer be a microgel, while claim 1 states that the polyanionic polymer cannot be a microgel.

Claim 2, line 5, after "and" the term --- appears to be missing.

Claim 3, line 6, recites "preferably" and the term may raise 112 issues.

Application/Control Number: 09/938,269

Art Unit: 1615

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blessing M. Fubara whose telephone number is (571) 272-0594. The examiner can normally be reached on 7 a.m. to 3:30 p.m. (Monday to Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thurman K. Page can be reached on (571) 272-0602. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
